**QUIZLET - ONLINE STUDY TOOL**

According to some experts, setting your students up for success means so much more than teaching daily lessons and hoping students do well on assessments. It goes without saying that you need to teach the information and then provide effective ways for your students to review what you've taught. As a result, some teachers like to create customized study guides and booklets for their classes, but that takes a lot of time and effort outside of school hours. That's why so many teachers consider using Quizlet, an online study tool, to save time when helping students prepare for tests.

Quizlet is considered to be a web-based application developed to help students study information through interactive tools and games. Quizlet's mission is to help students (and teachers) practice and master what they're learning. In Quizlet, information is organized into "study sets" that users like teachers or students add to their accounts. When using Quizlet, students log in and choose the appropriate study set for the concepts they need to review. These can be created by a teacher or generated by other users. Because of the flexibility and customization available, Quizlet can be used in any grade level and any type of class.

Overall, Quizlet can be a great tool for you and your students for three reasons:

1. You can easily differentiate review for your students
2. You can incorporate collaboration and teamwork into your classes

Students have another way to prepare for tests

Quizlet has seven standard study modes that help students review in the way that works best for them: Flashcards; Learn; Write; Spell; Test; Match; Gravity.

To sum up, with all of these options, you are creating a customized way for your students to review information, without you having to do a lot of extra work.
